FORESIGHT

Colouring Concept

Regally positioned at the top of Europe's expanding scooter market, the Foresight is a luxuriously appointed large-displacement scooter offering an unsurpassed combination of smooth, comfortable handling and spacious carrying capacity. In concert with efforts made to refine every detail, a new metallic silver colour joins the Foresight's three current variations for '99 to give further emphasis to its unmistakable look of prestige.

Continuing over from the current year are a cosmopolitan black that provides an elegant complement to any urban street scene, a lively, eye-catching candy red that stands out in a crowd, and a deep, sultry candy blue that gives the Foresight a jewel-like sheen of quality and distinction. All models feature dark grey moulded resin lower cowls and body parts that attractively complement the body-work's main colours.

Colours

- Porcelain Silver Metallic
- Pure Black
- Candy Glory Red
- Candy Extreme Blue

New Features

- New, softer, more compliant seat cover material.
- New rubber added to brake lock lever improves operating feel.
- Modified seat lock catch offers improved operation.
- New colour variation.
