

# 2005 FORESIGHT

New cast resin rear hand grip now painted in matching body colour for further emphasis on the Foresight's cosmopolitan good looks. Cast resin construction is also warmer to the touch on cold winter riders.

New dual multi-reflector headlight features a new side-by-side arrangement that is now recessed back from the front surface of the Foresight's newly designed front cowl for a strikingly modern and attractive new image and a wider area of night-time illumination.
